

ADETUNJI SAMUEL

FULLSTACK ENGINEER

Contact: samueladetunji000@gmail.com | [LinkedIn](#) | [Github](#) | +234 8137440918

I am a high-velocity FullStack Engineer and pragmatic generalist with 5+ years of experience shipping end-to-end products. Aggressive user of modern AI-assisted engineering tools (Cursor, Claude) to accelerate delivery, while maintaining the deep technical fundamentals required to debug complex systems by hand. Language-agnostic builder (currently utilizing Python, TypeScript, React, and PostgreSQL) comfortable shipping pixel-perfect UI in the morning, optimizing database schemas at noon, and deploying to production in the afternoon. Deeply aligned with asynchronous, high-ownership engineering cultures.

PROFESSIONAL WORK EXPERIENCE

BuildonHQ - Delaware US

April 2026 - till present

Senior Full-Stack Product Engineer

- Owned end to end product features for high-growth SaaS applications, operating with total autonomy to design, build, and ship from the database layer (PostgreSQL) to the client UI.
- Aggressively leveraged AI coding assistants (Cursor, Claude) to scaffold components and generate boilerplate, multiplying engineering output while maintaining strict security and code quality.
- Optimized system speed and reliability across the stack from tweaking SQL queries for lower latency to ensuring lightweight, accessible, and fast frontend DOM rendering.
- Collaborated in a highly asynchronous environment, prioritizing shipped code and rapid iterations over meetings.

Technophlix - India

Software Engineer

July 2024 - October 2024

- Collaborated on secure RESTful API development (Node.js/Express) and relational database integration, maintaining seamless, low-latency data flow for production-level traffic.
- Supported CI/CD pipelines via GitHub Actions and deployed cloud-native backend applications on AWS (EC2/S3).

Independent Software Engineer (Founder / Indie Hacker)

Jan 2018 - April 2026

Lead FullStack Engineer

- Built, shipped, and maintained custom SaaS platforms (including DBChores and developer tools) entirely from scratch, treating software engineering as both a profession and a core hobby.
- Engineered the complete subscription billing lifecycle for a high-traffic URL Shortener, designing idempotent Node.js webhook listeners to reconcile external payment states with internal databases.
- Applied a pragmatic engineering philosophy: routinely cutting marginal feature scope to simplify backend complexity and ship 100x faster.

PERSONAL PROJECTS

Agentic Workflow Orchestrator Micro-SaaS

- Architected a production-grade multi-tenant platform using Python (FastAPI, PydanticAI) and Next.js/TypeScript to orchestrate complex, multi-step LLM workflows and agent-based solutions.
- Engineered durable agentic workflows capable of maintaining state and coordinating work across extended interactions, implementing a custom event-driven state machine to prevent context drift.

PAAS(BYOC model)

- I am currently designing and developing a Bring-Your-Own-Cloud (BYOC) deployment platform, enabling users to orchestrate, provision, and monitor custom virtual private servers.
- I am engineering a high-performance, thread-safe REST API using Python and FastAPI, resolving concurrent SSL socket collisions through isolated database client dependency injection.
- Building a state-driven frontend dashboard using Next.js and Tailwind CSS, featuring a global context provider for dynamic workspace switching and Framer Motion for fluid, real-time UI interactions.

SKILL SETS (TECH STACK)

- **Languages & Frameworks:** TypeScript, Go (Gin), Python (FastAPI/Django), JavaScript, Bash
- **Databases & Data Engineering:** PostgreSQL, Apache Airflow, dbt, Data Integration, ELT/ETL Pipelines, Snowflake, Databricks, Redis, SQL Optimization
- **Databases & Storage:** PostgreSQL (Deep Expertise), Redis, Connection Pooling, Query Optimization, Prisma/ORMs
- **Infrastructure & DevOps:** Kubernetes concepts, Docker, AWS/GCP, Control Planes, CI/CD, HA/DR design
- **Architecture:** Distributed Systems, Asynchronous Pipelines, Microservices, WebSockets, REST APIs

CERTIFICATIONS: HACKERRANK SOFTWARE ENGINEER CERTIFICATION

EDUCATION: Obafemi Awolowo University - Bachelor of Medical Rehabilitation O.A.U 2021 - 2025 (August 30th) (CGPA 4.40)
